Education

University of Houston, Houston, TX

Aug. 2025 – Expected May 2029

Ph.D. in Electrical Engineering

Advisor: [Prof. Xingpeng Li](#), Renewable Power Grid (RPG) Laboratory

University of Illinois at Urbana-Champaign, Urbana, IL

May 2025

Master of Engineering in Energy Systems

The University of Sheffield, Sheffield, UK

June 2024

Bachelor of Engineering in Electrical and Electronic Engineering, *First Class Honours*

Technical Summary

Ph.D. researcher specializing in power system operations, planning, and large-load integration. Experienced in SCUC, generation and transmission expansion planning, hosting-capacity assessment, and GPU-accelerated full-year optimization on Texas-scale networks. Proficient in Python, Pyomo, Gurobi, CPLEX, NVIDIA cuOpt/PDLP, and HPC computing.

Research Experience

Graduate Research Assistant

Aug. 2025 – Present

Renewable Power Grid (RPG) Laboratory, University of Houston, Houston, TX

Advisor: [Prof. Xingpeng Li](#)

- Built security-constrained unit commitment (SCUC) models that shift data center load across buses and hours, reducing transmission congestion, renewable curtailment, and operating cost.
- Developed a co-optimized generation and transmission expansion planning model with embedded unit commitment on IEEE RTS-24, showing that 500 MW of data center load is served by new generation instead of new lines and raises total planning cost by 62%.
- Compared four security models, from OPF to N-1 SCUC, for bus-level data center hosting capacity, quantifying how much simplified models overstate the load a bus can accommodate.

Research Aide (Summer Internship)

May 2026 – Aug. 2026

Argonne National Laboratory, Lemont, IL

Supervisor: [Dr. Jonghwan Kwon](#), Energy Systems and Infrastructure Analysis Division

- Built a Monte Carlo cross-stress framework for generation expansion planning under uncertain data center deployment, evaluating 30 candidate portfolios against 30 deployment scenarios on a 254-bus Texas 2030 system.
- Solved 1,161 full-year (8,760-hour) linear programs on GPUs with NVIDIA cuOpt/PDLP in Argonne's [A-LEAF](#) framework.

Publications

Published and Accepted

- **H. Wan** and X. Li, “Data Center Spatio-Temporal Load Flexibility in Security-Constrained Unit Commitment for Enhanced Grid Efficiency and Reliability,” to appear in *Proc. IEEE Industry Applications Society (IAS) Annual Meeting*, Vancouver, BC, Canada, Oct. 2026. [[arXiv](#)]
- **H. Wan**, L. Fang, and X. Li, “Grid Operational Benefit Analysis of Data Center Spatial Flexibility: Congestion Relief, Renewable Energy Curtailment Reduction, and Cost Saving,” in *Proc. IEEE Power & Energy Society General Meeting (PESGM)*, Montreal, QC, Canada, Jul. 2026. [[arXiv](#)]

Under Review

Teaching Experience

Graduate Teaching Assistant

Jan. 2026 – May 2026

ECE 5380 Power Electronics & Electric Drives, University of Houston

Instructor: [Dr. Hao Huang](#)

- Graded homework and examinations and provided written feedback for a synchronous online graduate course on power semiconductor devices, converters and inverters, and motor drives.

Graduate Teaching Assistant

Aug. 2025 – Dec. 2025

ECE 5388 Renewable Energy Technology, University of Houston

Instructor: [Dr. Hao Huang](#)

- Assisted with instruction and assessment for a course on solar, wind, and grid integration of renewable resources.

Technical Skills

- **Optimization & Modeling:** Pyomo, JuMP, AMPL, Gurobi, CPLEX, NVIDIA cuOpt/PDLP, MadNLP
- **Programming Languages:** Python, Julia, MATLAB, C, C++
- **Power System Tools:** MATLAB/Simulink, LTspice
- **Machine Learning:** PyTorch, scikit-learn, pandas, NumPy
- **Computing:** Linux/HPC (Slurm, PBS), GPU computing (CUDA), Git
- **Languages:** English (fluent), Mandarin Chinese (native)

Honors and Awards

- Engineering Excellence Scholarship, The University of Sheffield *2021–2022, 2022–2023*
- NCUK Sheffield Scholarship, The University of Sheffield *2021–2022, 2022–2023*
